

The First Tee practice area is getting an upgrade. We have recently installed new irrigation lines to help accommodate 43 new sprinkler heads. This spring we will use the newly irrigated area to create a sod nursery with roughly 5 acres of Hybrid Bermuda and Zoysia grasses. This nursery will be used to not only help the golf course but also act as a sod resource for other departments within the city. Our First Tee participants will also get the benefit of learning the game on some of the best turf conditions.
